

DIME Tiles

1-800-638-9355

DIME Tiles are drop-in ceiling tiles designed to rest in 2' x 2' grid systems to absorb sound reflections in a variety of settings. These tiles produce a much stronger sound absorption coefficient than a standard ceiling tile.

- 2' x 2' squares
- 2" nominal thickness
- White
- Bevel Designs Optional

Applications:

These drop in ceiling tiles are ideal for combating background noise in a variety of settings that could include home theaters, offices, conference rooms, recording studios, musical rehearsal rooms, and more.
