

FireFlex

1-800-638-9355

FireFlex is cut from class A fire rated melamine foam. These sound panels absorb unwanted sound reflections in a variety of settings where high heat, open flame exist or where a class A fire rating is required.

- 24" x 48" panels
- convoluted surface is not continuous
- 2", 3" or 4" thickness
- white or concrete gray

Applications:

Ideal for use in noise infested industrial settings where high heat or exposed flames exist. Also suitable for treatments in public buildings that require a class A fire rating. Thicker panels will absorb more low base sound reflections.

Product Data:

Foam	Open cell melamine foam
Color:	White or gray
Installation:	Silicone adhesive
Weight:	2# density foam
Fire:	Class A

Acoustical Performance:
