VET Panels

VET Panels suspend vertically against perimeter walls in a variety of loud commercial or industrial venues where VET Baffles are impractical. Ideal for combating sound wave reflections in natatoriums, kennels, and loud industrial environments.

- 24" x 48"
- 2" thick
- Grommets in 2 corners
- 12 PVC colors

Applications:

In commercial settings, the VET Baffles absorb sound reflections, cleaning out background noise in a room, and delivering clean room acoustics back into the room. For industrial settings, the baffles absorb machine noise, and reduce decibel level exposures for employees.

Product Data:

Core: Fiberglass
 Color: 12 PVC Colors Available
 Installation: Vertical Suspension via Grommets
 Fire: Class A

Acoustical Performance:

	Octave Band Frequency (Hz)						
Product	125	250	500	1000	2000	4000	Sabins
